Kari Mielikäinen
Mauri Timonen
Margit Pudas-Timonen

A visit to V.N. Sukachev Institute of Forest
12-18.09.2005

Joint photo collection
(75 photos)
Kari Mielikäinen:
The renewing Metla builds the future of Finnish Forestry and Forest Research. Present activities, new challenges and international cooperation.

Growth and yield studies and the changing climate in Finland. How to utilize the Finnish networks of experiments, permanent plots and other well-replicated regional data sets in global climate change research?

Mauri Timonen:
Building a 7638-year long tree-ring chronology at the Finnish pine timberline. Do we have a joint interest in the northern conifer forest for cooperative Finnish-Russian approaches in tree-ring and other types of proxy research?
